Chris Palmer
*Full-Stack Senior Software Engineer*
web-dev.uk

ABOUT

With over 6 years of experience in both websites and app development, my expertise in technology has proven to yield effective results for many different industries. I love working as part of a team and enjoy the process of bringing projects from ideation to delivery.

Working alongside good teams of developers I have scaled many projects, built resilience and improved security including the launch for Sky Glass which had 4 million users in 4 days and no errors. I also love to produce music in my spare time from my years of working as a sound engineer and hope to combine my two passions of music and tech in the future.

University Of The Creative Arts

1 A-Level in Music
The North London School of Music

2 A-Levels in Art & Photography
Queen Elizabeth's Grammar School For Boys

EXPERIENCE

NTT DATA | Senior Software Engineer
02.2021 - Present
Working as a Software Engineer for various companies and teams including :

Sky | Software Engineer - product launch (Sky Glass).
02.2021 - 02.2022

The role was mainly working on the resilience and security for the main sky.com website in order to prepare for the high levels of traffic for the Sky Glass launch. This involved updating content security policies, circuit breaker monitoring, varnish caching systems, akamai configs, debugging any user / sales journey issues. Unit testing, NFT testing and regression testing. After launch, the site was successfully able to handle traffic of over 4 million visitors in 3 days of launching.

The Harrington Residences | Senior Software Engineer - Tech Lead
10.2019 - 02.2021

Leading a team of developers and ensuring code standards are maintained. Writing tech tests, interviewing new candidates, mentoring and training staff. Currently building a Node.js and Express.js API using Amazon Web Services EC2 instances) on a MERN Stack. Developing React Mobile Applications, WordPress Themes and Plugins with membership portals for our hotel booking platform. Increasing my Knowledge of the Financial Investment & Banking sector also.

Penguin Random House | Software Engineer
07.2019 - 10.2019

Developing an internal web application with a Twitter API and PRH own biblio database api. The application was designed to import tweets with a certain hashtag that would be claimed by a member of staff and posted back to twitter after searching for a book recommendation. Developing for WordPress with Adobe Experience Manager whilst building WordPress themes in an agile environment alongside Adobe Developers.
